Italian Citizenship (EU) · Immediate Availability · Remote / Hybrid / On-site across Spain & the EU

PROFESSIONAL SUMMARY

Frontend Engineer and software developer with 11+ years at Globant (Fortune 1000 / NYSE: GLOB), developing digital products for global clients including The Walt Disney Company, EY, and TTEC. Specialized in React, Angular, TypeScript, and Roku/BrightScript development for streaming platforms. Extensive experience collaborating with distributed teams in Agile environments and delivering production-ready software for large-scale applications.

TECH STACK

Languages: JavaScript (ES6+), TypeScript, BrightScript, HTML5, CSS3, SQL

Frontend: React.js, Angular, Redux, Tailwind CSS, Bootstrap, LESS/SASS, jQuery, Responsive Design

Streaming / OTT: Roku SDK, SceneGraph, Custom Component Framework, Adobe Analytics, Ad Integration

Backend / APIs: Node.js, REST APIs, service integration, build & deploy scripting

Testing & QA: Manual Testing, Test Cases, Bug Reporting, Cross-browser/Device Testing

DevOps & Tools: Git, GitHub, CI/CD pipelines, Jira, Confluence, AI-Assisted Development (Copilot, Cursor)

Methodologies: Agile, Scrum, Kanban, Component-Based Architecture, Code Review, Pair Programming

UX & Quality: Web Accessibility (WCAG, ARIA), Web Analytics, Performance Optimization, Technical SEO

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer · Globant (Fortune 1000 · NYSE: GLOB · 30K+ global employees)

Córdoba, Argentina (remote for global clients) · Jan 2015 – march 2026

Client: Disney Streaming — Roku Apps (ABC, ABC News, Nat Geo, FX Now) 2021 – 2026

- Developed and maintained multiple Roku streaming applications for Disney-owned premium brands, reaching millions of devices across the United States.
- Built reusable UI components using BrightScript and SceneGraph within Disney's proprietary framework, accelerating feature delivery across multiple applications.
- Integrated advertising modules and Adobe Analytics tracking events to support monetization and user behavior insights.
- Automated multi-environment build and deployment processes using Node.js, reducing release times and manual delivery errors.
- Led technical efforts to resolve UI defects and accessibility improvements across TV applications, increasing overall platform quality and Roku certification readiness.

Client: EY (Ernst & Young) — Internal Enterprise Web Application 2020 – 2021

- Maintained and modernized a global internal Angular application used across the organization.
- Implemented lazy-loaded modules, significantly improving initial load performance and user experience.
- Collaborated within Agile/Scrum teams alongside QA engineers and international stakeholders to ensure stable production releases.

Client: TTEC (Teletech Consulting) — Interactive E-Learning Platform 2017 – 2020

- Developed interactive corporate e-learning solutions using JavaScript, HTML5, and CSS3.
- Built custom learning modules including quizzes, mini-games, and interactive animations.
- Implemented client-side state management to persist learner progress and improve course completion rates.
- Designed reusable UI components and UX patterns that became standardized across the platform, accelerating future course development.

Client: The Walt Disney Company — Parks & Cruises Ticketing Platform 2015 - 2017

- Maintained and enhanced Disney's global parks and cruise ticketing platform built with Angular, serving millions of users in high-traffic production environments.
- Resolved critical UI and component behavior defects prioritized through ticketing systems, reducing user-facing bugs and improving release stability.
- Implemented accessibility improvements aligned with WCAG 2.1 standards, including ARIA roles, keyboard navigation, and semantic HTML structures.
- Ensured consistent cross-browser and cross-device experiences while collaborating with distributed QA, Design, and Product teams across the United States and Latin America.

TECHNICAL ACHIEVEMENTS & LEADERSHIP

- 11+ years of continuous growth within one of the world's leading technology consulting companies, successfully contributing to multiple Fortune 500 accounts including Disney, EY, and TTEC.
- Extensive experience delivering software in English-speaking environments (B2 level), collaborating daily with teams across the United States, Europe, and Latin America.
- Recognized Roku/BrightScript specialist within frontend engineering teams, contributing technical guidance and ensuring high-quality code through thorough pull request reviews.
- Early adopter of AI-assisted development tools such as GitHub Copilot and Cursor to accelerate refactoring efforts and improve code consistency and productivity.

EDUCATION

Associate Degree in Video Game Development & Virtual Simulations · IES Siglo 21, Córdoba, Argentina · 2010 – 2014
QA Manual Testing — Coderhouse (online) · 2024

LANGUAGES

Spanish: Native **English:** B2 (Upper-Intermediate) — Daily professional use with U.S.-based clients and international teams
